

Doug,

I want to thank both you and your company for all the support that you gave us during our most recent installation. We appreciate all the extra effort that you put into, not only the installation, but also the training that you provide. You have helped our adjusters truly understand how to properly use the system and how to troubleshoot, as well as maintain it. We have implemented a lot of the ideas that you provided. We are very happy with Dynatec systems and look forward to retrofitting more of our machines in the future.

Thank you,

Plant Engineer
