ITW Dynatec®

THE NEXT LEVEL OF TECHNOLOGY

Introducing the Simplicity Gear Pump

One proven platform. More capability. Ready when you are.

Dear Valued Customer,

We are pleased to introduce the new **ITW Dynatec Simplicity Gear Pump**, our proven hot-melt platform, now with greater flexibility, faster start-up, and improved hopper performance to help maximize uptime across a wide range of packaging and assembly applications.

What's New

- **Flexible Voltage Options** – Select from 120V, 240V, 400V and 480V configurations to meet application and facility requirements.
- **Rapid Start** – Available on 240V, 400V, and 480V configurations, Rapid Start reduces start-up time by up to 50%, helping equipment reach operating temperature sooner.
- **7-Day Scheduler** – Program the melter to start automatically so it can be ready when production begins, saving upwards of $2,500 per unit in productivity savings each year.
- **Expanded Hopper Options** – Choose between 4 kg and 8 kg hopper capacities to match adhesive consumption and production requirements.
- **Dual-Coat Hopper** – A best-in-class ceramic base with a release layer provides enhanced non-stick performance and durability.
- **Low-Level Control Option** – Avoid unplanned interruptions by receiving a notification before the adhesive supply is depleted

Transitioning from Dynamini

The Simplicity Gear Pump will become ITW Dynatec's primary platform for future demand in this product category. It retains the 120V capability and gear pump options customers rely on while adding the enhancements of the Simplicity platform. Standard Simplicity Gear Pump configurations are stocked and available to ship within 24 hours (US only).

To learn more, visit **www.itwdynatec.com** or contact your local ITW Dynatec sales representative.

Thank you for being a valued ITW Dynatec customer. We look forward to helping you put the new Simplicity Gear Pump to work.

Regards,

The ITW Dynatec Team
